

## CHILD AIDS PREVENTION

Dear Fellow Rotarian,

Thank you for agreeing to join us in our common effort to rid the world of the scourge of childhood AIDS in Africa. This package contains all the materials you will need to deliver an effective Rotary Club presentation about our Child AIDS Prevention project that is designed to prevent the transmission of HIV from mother to child during the birthing process.

This package contains the following:

- **DVD** containing a PowerPoint presentation on Child AIDS Prevention with speaker notes; an inspirational film clip on this subject from U.N. Ambassador Stephen Lewis on the tragedy of childhood AIDS; and additional information and resources on HIV, AIDS and Child AIDS Prevention.
- **Fact Sheet** with background information on HIV/AIDS and mother-to-child transmission of HIV.
- **Poster** highlighting the importance of a single, one dollar-a-day drug, nevirapine, a cost effective treatment for preventing the transmission of HIV from a mother to her newborn infant.
- **Brochures** and **Donor Envelopes** for distribution at your meetings to further inform your fellow Rotarians about Child AIDS Prevention and to solicit their help on this project.

This should be all you need to make an informed and professional presentation on the subject of Child AIDS Prevention. For further assistance in making your presentation a success, you can contact us by email at [info@rotaryaidsproject.org](mailto:info@rotaryaidsproject.org) or find more information through the Los Altos Rotary AIDS Project web site, [www.rotaryaidsproject.org](http://www.rotaryaidsproject.org).

Thanks for agreeing to help!

**Rich Casey**

President

Los Altos Rotary AIDS Project
